

CONTRACT MANUFACTURING

Let us put our plant and equipment to work for you!

Our metal fabrication experience and state of the art equipment is available to provide you proto-types, limited or mass production

Give us a drawing, or your napkin sketches and we will fabricate it.

Our services include:

- Custom Welding—Mig and Tig
- Sheetmetal Shearing, Bending and Forming
- Waterjet Cutting
- Plasma Cutting
- Pipe and Angle Rolling
- Complete Design Engineering Services

SYSTEM TECHNOLOGIES, INC.

System Technologies is an Indiana corporation founded in 1989 to design, manufacture and install the most comprehensive solutions to our customers needs in finishing and cleaning systems. System Technologies, Inc. is comprised of two divisions: STI Industrial

Finishing Systems Division and STI Aqueous Cleaning Systems Division. **System Technologies knows cleaning and finishing.** After all, the finish on your product is what's important. We have over 35 years experience in finishing and cleaning technology. We understand all the options available and the ability to assess accurately our customers needs and provide properly integrated equipment to maximize production and quality. We integrate talent, resources and experience from suppliers and customer to achieve project success. By stressing a team approach and a strong customer/supplier partnership, we are able to optimize process performance and guarantee system integrity while maintaining clear-cut cost and schedule control. **Our total project management approach saves you time and money.** Our personnel become members of your team. We assume full responsibility for design, manufacture, installation, training and service. We do complete testing to prove our concepts and system design.

TRAINING AND SERVICE

Well trained people make the most of OUR systems. We make sure that your people can work smart to maximize the systems capability. Training is done in your facility, on your system with your personnel. The system must perform to your standards.

We guarantee that. System Technologies offers an unparalleled warranty that includes two years parts and labor on the equipment we manufacture. We have built an outstanding reputation by meet-

ing our customers goals, and we can do the same for you.

OUR ENGINEERED PRODUCTS

FINISHING EQUIPMENT AND SYSTEMS

- Monorail Pretreatment Systems
- Convection Drying and Curing Ovens
- Infra-Red curing Ovens
- Ultra Violet Curing Ovens
- Liquid and Powder Application Systems
- Robotic Paint Application Systems
- Robotic Sealant and Gasketing Cells
- Paint Supply and Circulating Systems
- Environment Controlled Rooms
- Monorail Conveyor Systems
- Power & Free Conveyor Systems
- Air Replacement Systems
- Paint Sludge Removal Systems
- SmarTouch PLC Control Systems

AQUEOUS CLEANING SYSTEMS

- Monorail Washers
- Inline Belt Washers
- Return to Operator Washers
- High Velocity Blow-Off Systems
- Convection Drying Ovens
- Immersion Cleaning Systems
- Ultra-Sonic Cleaning Systems
- Small Parts Drum Washers
- Robotic Integrated Systems
- Pallet and Dunnage Washers
- Front Loading Cabinet Washers
- Indexing Fixtured Washers
- Oil Coalescing Systems
- PH and Conductivity Control
- Chemical Metering Systems
